

Abstract: Hawkes Learning Systems is a mastery-based homework and testing system provides error-specific feedback for students and a complete course management system for instructors, see <http://www.hawkeslearning.com/Instructors/HowTheSoftwareWorks.htm>

Hawkes Learning Systems supports a framework to support course redesign, with a focus on active learning. Course redesign is defined as: “changing instructional methods and implementing technology in order to make entire courses - not just single classes - more effective and improve student results. Course Redesign is NOT simply making a course available online, it is implementing technology to make a course more successful!” Please, see <http://www.hawkeslearning.com/Instructors/CourseRedesign.htm>
